

HOW MUCH CAN THE NORTHWEST COMMUNITIES BEAR

As we approach a more normalised society post the COVID-19 pandemic the State Government has failed to invest in the upgrade of the Calder Freeway. In particular the upgrade of the Calder Park Drive/Calder Freeway Overpass for those commuters who use the Calder Freeway on a regular basis.

Unfortunately our advocacy and those of councils and other groups have gone unnoticed and ignored to the detriment of the local communities. To navigate the dangerous stretch between Keilor Park and Calder Park Drive has become unbearable. Additionally the 100 KMH has not been reimposed fully to the satisfaction of commuters who are angered and outraged over the lack of any formal funding commitment from the State Government.

While the State Government continues to approve future housing developments in Sydenham, Diggers Rest, Sunbury and Gisborne South the traffic congestion and numerous accidents will increase to the detriment of our collective communities.

The State Government has failed to adequately plan for future road infrastructure in the Northwest communities and thereby future generations will ultimately condemn us for!
